

Print out this eye chart to determine your lens power for your CliC readers

CliC readers are a new advance in eyewear with substantial improvements over the traditional solution to reading only glasses. The most innovative feature is the patented magnetic closure. This allows CliC readers to use a combined adjustable headband and neck strap which means not only do CliC readers stay in place while you are wearing them but also hang comfortably around the neck when not in use. You will never misplace your readers again. Other features include: Rugged, lightweight construction for ergonomic comfort and long durability.

To determine the diopter best for you refer to the following chart to take the easy, self administered CliC readers eye test outlined below.

Eye Chart

To determine your lens power, read the text below without glasses from 14 inches away. Match the first line that appears blurry to the power shown on the left.
